Skills & competencies

- Good at taking ownership and responsibility, working independently, and creatively solving problems within given constraints
- Extensive experience with front-end development, including building responsive websites and implementing animations and interactions using Next, React, Expo, React Native, TypeScript, HTML, CSS, SASS, and many different APIs
- Extensive experience with back-end development, including building interactive applications with database connections using Supabase, PHP, Deno, Node, JavaScript, TypeScript, MySQL, WordPress, and many third-party libraries
- Proficient with Adobe Creative Cloud software, Figma, and Git
- Strong knowledge of design thinking and agile methodology with experience working in iterative sprints
- Proven experience in team collaboration with excellent communication skills and a strong team spirit
- Creative, analytical, solution-oriented, and positive attitude

Work experience

Diks Autoverhuur / Amstelveen

SEP 2025 - CURRENT, FULL STACK DEVELOPER

- Migrated the hosting environment (AWS) from a third-party development agency to an in-house team.
- Joined as the first in-house developer and took a leading role in transitioning development from an external agency to an internal development and design team
- Coordinated and played a major role in creating a self-registration platform to streamline business processes, contributing to planning, UX, and development
- Onboarded new developers, established code review processes, and took responsibility for system uptime and reliability
- Worked with an inherited custom TypeScript framework and a technology stack including TypeScript, React Query, React Native, Next.js, DatoCMS, Node.js, AWS, queuing systems, and various external REST APIs for real-time integrations

ZZP'er / Hoofddorp

MAR 2023 - SEP 2025, FULL STACK DEVELOPER

- Researched, designed and developed a food tracking app called Swiftbite using Figma, Expo and Supabase
- Developed a software product called Presently for digital signage in primary schools based on Supabase, CloudConvert, and Next
- Developed an app called Overworked for sports tracking with Expo and Supabase for Android and iOS
- Designed and developed websites for small businesses and freelancers using Nuxt 3 and Next with Decap

Momkai / Amsterdam

SEP 2024 - JAN 2025, DESIGN INTERN

- Designed websites such as SCW System and The Can Do Company in Figma with a focus on brand consistency, and user experience
- Assisted with visuals and layout design for various books using Adobe Illustrator, Photoshop, and InDesign
- Helped with the creation and maintenance of design systems and documentation for both Momkai and its clients
- Worked within the design team and coordinated directly with the UX team to ensure timely and accurate deliveries

Get Interactive / Nieuwegein

FEB 2019 - MAR 2023, WEBDEVELOPER

AUG 2018 - FEB 2019, STAGIAIR

- Developed websites for various medium-sized clients independently and in collaboration with teammates. This included both front-end and back-end development
- Utilized various technologies such as PHP, MySQL, JavaScript, Vue, Symfony, HTML, CSS, and SASS
- Project planning including time estimation
- Communicated with clients about expectations, project progress, obstacles, and solutions
- Periodic reporting using Scrum methodology

Minty Media / Haarlem

MAR 2023 - JUN 2023, INTERN

- Complete redesign of the existing hosting portal for clients in Figma to improve user experience and overall look
- Implemented authentication and new Figma design of the hosting portal in Next.js with Ant Design
- Organized planning for redesign
- Supported less experienced employees and interns with JavaScript and PHP programming

Studentaanhuis / Hoofddorp

DEC 2017 - SEP 2018, IT SUPPORT

- Provided home computer assistance for various software and hardware issues, including printers, smartphones, desktops, laptops, tablets, backups, digital television, software installation, email, internet, and network setup
